

World Humanitarian Summit Commitments

Clean Cooking Alliance

2019

Individual commitments

2D Take concrete steps to improve compliance and accountability

Individual Commitments

Commitment Description	Commitment Type	Core Responsibility	Commitment ID
The Global Alliance for Clean Cookstoves commits to working with humanitarian agencies to investigate the linkages between sexual and gender-based violence and energy access. It commits to conduct research on the protection impacts that adoption of improved cookstoves and fuels can have for crisis-affected women and girls, and to advocate for better access to fuel and household energy to ensure better health, safety, livelihoods, and food security. 4A Reinforce, do not replace, national and local systems

Individual Commitments

Commitment Description	Commitment Type	Core Responsibility	Commitment ID
The Global Alliance for Clean Cookstoves commits to provide technical guidance, training, and support to humanitarian agencies to help mainstream cleaner and more efficient cookstoves and fuels into non-food item programming and distributions in accordance with The Sphere Project Handbook Minimum Standards in Humanitarian Response (NFI Standard 4). Through access to cleaner and more efficient cooking technologies and fuel, it aims to reduce firewood use and improve the health, environment, safety, and livelihoods of crisis-affected populations. 4C Deliver collective outcomes: transcend humanitarian-development divides

Individual Commitments

Commitment Description	Commitment Type	Core Responsibility	Commitment ID
------------------------	-----------------	---------------------	---------------

The Global Alliance for Clean Cookstoves commits to work with humanitarian agencies to innovate on technology and approaches to increasing access to household cooking energy. The majority of people in humanitarian settings use traditional biomass (primarily firewood) for cooking, which often leads to higher rates of respiratory disease, safety risks for women and girls, and deforestation. As a technology and fuel neutral public-private partnership, it commits to help humanitarian agencies set minimum standards for cookstove and fuel performance, and to support innovation on cooking technologies and fuel.
