Humanitarian Innovation Forum Japan 2016 was truly a multi-stakeholder (government, business sector, NGOs, affected communities) endeavor in Japan with one common purpose in mind: bringing positive impact for those affected by crisis. Given that the forum was organized in Sendai also gave an opportunity to send an important message to the world that humanitarian innovation is thought, discussed, and implemented from disaster affected areas in Japan. Organizers commit to share the lessons and methodologies of the forum widely with regional stakeholders (starting from Asia Regional Steering Group of WHS).
